

cosine is a dynamic high-tech company which develops and builds measurement systems for its customers. These systems are used in scientific, industrial, medical, environmental, energy, agri/food, security, semiconductor and space applications, with customers ranging from small high-tech companies to Space Agencies and large multinationals.

cosine currently has a staff of around 40 international and highly educated employees who develop in close collaboration with our customers. With our broad experience in different technological areas, cosine provides innovative, out-of-the-box measurement solutions.

Our office in Warmond houses fully equipped cleanrooms, as well as testing and assembly facilities, offices and meeting rooms. The building is modern and spacious and can be easily reached by public transportation, as well as by car.

We are preparing to expand our laboratory and cleanroom facilities and are looking for a colleague to come work with us as a

Technical Facility Manager (0.8-1.0 FTE)

Job description

Our high energy optics business unit develops and produces X-ray and gamma-ray optics for astrophysical and medical applications. As part of the development we run large projects that involve dealing with international customers and suppliers. We are expanding our current facilities, because of the growth of our business. Therefore, we are looking for an experienced technical facility manager to oversee and support all building-related activities with regard to the laboratory and cleanroom facilities.

You will be responsible for the planning and coordination of all installations and renovations. Your goal is to ensure our laboratory and cleanroom facilities are safe and run smoothly, so that our employees can work under the best conditions.

The ideal candidate is well-organized, with a hands-on approach, able and willing to carry out maintenance activities and simple installations in order to get the job done. Your challenge is to optimize the use of space and equipment while reducing operating costs. Leadership abilities and a high level of efficiency can set you apart among other candidates.

Responsibilities

- Plan and coordinate all installations and renovations
- Write a plan of approach including requirements, budget and planning
- Supervise the execution and monitor the agreed time, cost and quality thereof
- Ensure that the installations and renovations are delivered on time and within budget
- Manage the upkeep of equipment and supplies to meet health and safety standards
- Performs maintenance and small installations
- Actively improve the laboratory and cleanroom facilities and advise on improvements regarding efficiency and quality

Skills and qualifications

- Proven experience as a technical facility manager or equivalent thereof
- Experience in a production or cleanroom environment is a strong advantage
- Well-versed in technical/engineering operations and best practices of facility management
- Excellent organizational and leadership skills
- Proficient communication skills in Dutch and English
- Ability to solve problems efficiently, pragmatically and independently
- BSc in engineering, facility management or equivalent thereof
- Relevant professional qualifications e.g. VCA-VOL, VOP (Voldoende Opgeleid Persoon), GMP and project management are considered an advantage

We offer

A part- or full-time job in a dynamic and international setting where you can combine your organizational skills with highly innovative technology and applications, with good and flexible working conditions.

Application
